

# GRAND MASSIVE PLUS

WPC full terrace profile

**Mono-composite, completely-colored full profile – ground surface with relief of wood, perfect feeling from natural material.**

- Method of production: extrusion technology
- Material composition: WPC mixture *PERWOOD* - PVC (min. 50%), wood beech flour (max. 45%), additives, stabilizers
- Dimension: 21 x 161 x 4000 mm (custom lengths up to 6 m)
- Weight: 3,45 kg/m
- Surface: Emboss + ground
- Color shade: Ivory, Brick, Light oak, Cherry, Dark chestnut, Gray stone, Ebony

**Approximate material consumption per m<sup>2</sup>**

Terrace profile GM Plus	6 bm	
Base prism	3 bm	
Double clip	18 ks	
Screws 4x40	18 ks	

**Test results of the Institute for Testing and Certification, a.s.**

Technical characteristic	Unit of measure	Determined value (mean value)
Shrinkage after thermal stress	%	0,30
Impact resistance when falling weights	%	0 broken test with specimens failure depth ≥ 5 mm
Slip	Min. 36	75
Swelling and water absorption		
- Change of format	%	Thickness change: 3,8 Width change: 0,7 Length change: 0,2
- Swelling	%, weight	5,5
Bending properties – deflection at 500 N	mm	1,5
Density	kg/dm <sup>3</sup>	1,4

The product meets the requirements of the document: Construction technical certificate in all properties.
